Stadium Map Art *Laser Cut Stadium City Map*

Zach Holt decided to push the creative limits of a laser etching machine by making artful 3D stadium maps that celebrate sports arenas—professional and college—and their fans.

The Made in the USA pieces from Stadium Map Art capture details of not only some of the most famous stadiums in the country, but also the elements of the surrounding area, too. Landmarks like rivers, buildings, and streets help create a bigger picture, and make for an eye-catching map.

The process starts with satellite pictures that Zach then zooms in on to capture the details of each stadium and its neighborhood. He creates a digital drawing of each image, laser cuts the pieces in Baltic Birch plywood, and then assembles the layered three-dimensional bird's-eye view by hand. The natural, attractive finish is an elegant way to show off your allegiance to a favorite team.

This Grommet is a customized product of:

made to order just for you!
The Maker is building this and
production takes up to 2 weeks. We're
sure you'll love it when it arrives.
