

RZ Mask Sizing

To determine the correct mask size for your facial structure, we recommend taking exact measurements using the method described below.

1. Measure from the bridge of your nose to just under your chin. *See picture below. (It may be helpful to have a friend assist you)
2. Use the measurements you have taken and match to the best fit:

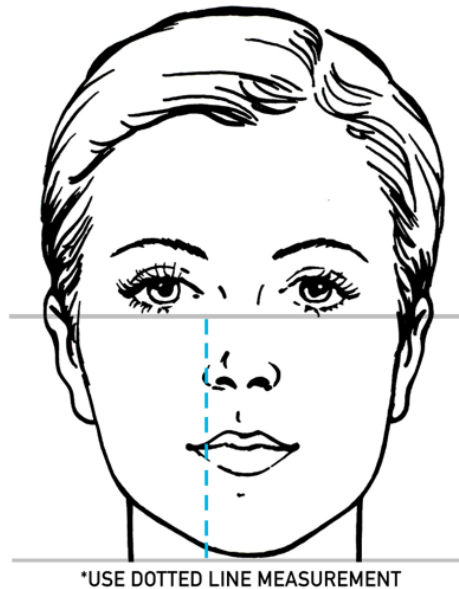

Extra Large: 4.5" - 5.5"

Large: 4" - 4.5"

Medium: 3.5" - 4"

Note: If your measurement falls on two sizes (i.e. 4" can be large or medium), refer to weight guide below to determine best sizing.

Filters are designed to match your chosen mask size, i.e. Extra Large mask houses an Extra Large filter.

Below is a general guide based on body weight (note that facial measurements are more accurate for ensuring correct fit).

Extra Large: 215 lbs +

Large: 125 lbs - 215 lbs

Medium: Up to 125 lb
