

## INSTRUCTIONS

PLEASE READ ENTIRELY!

Inflation is key to your Olllyball's performance!

FIG. 1

FIG. 2

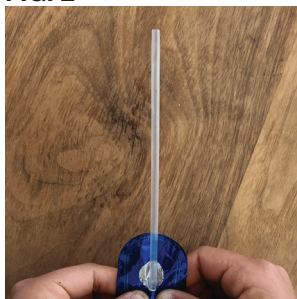

FIG. 3

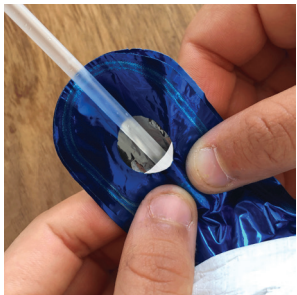

FIG. 4

1. Remove your new Olllyball from it's package, and gently crunch it up repeatedly for 1-2 minutes. (FIG.1)

2. Gently insert the tapered end of the inflation straw into the valve about 1 inch, between the white and clear tabs on the inner shell. (FIG.2)

3. Hold both thumbs against the valve opening, keeping the air tight when inflating. Blow into the straw to inflate the ball until it is approximately half full. (FIG. 3)

4. Crunch the ball for approximately 2-3 minutes. This activates the KrunchCOR®.

5. Inflate until the outer shell is firm. Do not over-inflate, to allow for pockets of air between the bladder of the ball and the outer shell, increasing what's known as the 'Coefficient of Restitution' - this is the scientific way of saying your Olllyball will expand on the inside, absorbing shock and less likely to break stuff in the house!

6. Fold the valve over itself and gently tuck it inside the flap on the outer shell. Olllyball is ready to play with! Customize your new Olllyball using your own crayons and most markers!

For replacement KrunchCOR® bladders, contact go to [ollyball.com](http://ollyball.com)

Please feel free to share your OLLYBALL story with us on our Facebook, Instagram, or homepage at [ollyball.com](http://ollyball.com). If you have any issues with your product please contact us directly at [ollyball.com](http://ollyball.com), we are happy to help!

Thanks for Playing Ball in the House!
