A GIFT *for* YOU

Golf meets cornhole. This new favorite backyard game has been in high demand and will be on its way to you soon. We think you'll agree it's worth the wait.

Chippo Golf

Outdoor Golf Game

Chippo is the golf-based dream game of Maker Brendan McAuley. An avid golfer, Brendan thought combining his favorite sport with his favorite pastime—playing backyard games—was a winning idea. His brother-in-law and golfing buddy, Matt, soon joined him to help create this fun game.

Using your own club, you can follow their scoring system, make up your own way to play, or just practice chip shots. The boards are easy to move or take along to the beach, a cookout, or wherever you want to play. High-density foam balls hit like the real thing, but won't cause damage like real balls can. And the mats are covered with turf, a touch golfers will appreciate.
