

HOW TO USE (Each pair of plastic booties are meant for one time use.)

After cleansing your feet, put the plastic booties on both feet and secure the booties around each ankle using the enclosed pieces of adhesive tape.

Note: We recommend to place a pair of socks over the plastic booties and remain seated.

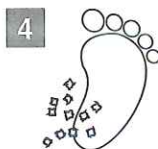

Wear the plastic booties for one hour to allow product to absorb.

Note: To enhance the effects of Baby Foot, we recommend soaking your feet prior to the treatment.

After one hour, remove the plastic booties and wash your feet with soap and water.

AFTER USE

The dead skin cells will begin to peel from 5-7 days after the initial application.

You can start the peeling process by rubbing the feet very gently with a clean cloth or the palm of the hand.

The dead skin cells could continue to peel naturally for up to two weeks, depending on the amount of dead skin on the feet, leaving your feet soft and smooth, just like a baby's foot.
