**ANYWHERE FIREPLACE™**

The high style and distinctive contemporary design of the **Anywhere Fireplace™** allows the ambiance of a fire to be enjoyed in any room, garden or patio. It is ventless, requiring no chimney or gas line because it uses clean burning bio-ethanol liquid fuel that is smokeless, odorless, and leaves no soot or ash. You can place the **Anywhere Fireplace™** in your house, condo, apartment, terrace, garden, office or restaurant. It is sure to match most any décor and adds a rich warm atmosphere to your bedroom, living room, den, dining room... This unique, impressive, eco-friendly modern answer to the fireplace creates a bright yellow, orange and red flame, spreading cheerful glow across the room. It is non-toxic, non-polluting, has no messy clean up and is virtually free of maintenance. It is specially designed for indoor or outdoor use with special powder coating finish to give you that flexibility. For outdoor use, we also include a cover to ensure that no water or debris gets into the burners.

## WARNING

The **Anywhere Fireplace™** is **ONLY** to be used with **BIO-ETHANOL LIQUID FUEL FOR FIREPLACES**. The bio-ethanol fuel is a flammable product that requires strict adherence of the safety instructions.

## IMPORTANT SAFETY MEASURES

- This fireplace will produce heat, but should not be used as a main source of heat
- This fireplace is intended to be placed on a table or stable surface
- Be sure to keep any flammable materials such as drapes/curtains and any decorations at least 4 ft away from fireplace
- Do not place any items on top of or inside fireplace
- Do not touch the fireplace while lit or still hot
- **USE ONLY APPROVED BIO-ETHANOL LIQUID FUEL FOR FIREPLACES**
- It is extremely dangerous and forbidden to use bio-ethanol car fuel or any other unapproved fuel
- Always use a funnel or included measuring cup to fill the fireplace with fuel
- **Never add fuel to the burner while fire is burning or unit is still hot. Allow at least 15 minutes for fuel tray to cool down before refueling**
- **NEVER refill one cup while the other cups are burning**
- Do not ingest bio-ethanol fuel and avoid contact with eyes and skin
- Be sure to not spill any fuel outside of the burner. If you do spill, make sure to wipe up all spillage before igniting the fire
- Only use a long match or long lighter to ignite fire
- Be sure to have a fire extinguishing device in the proximity of the fireplace in case of emergencies
- Never leave a lit fireplace unattended
- Be sure to keep children and pets away from the fireplace while lit and while still hot after extinguishing
- Do not smoke when filling the burner with fuel
- Store your fuel containers away from any heat source
- Be sure to store and keep your fuel away and out of reach of children and pets
- To extinguish flame, place snuffer handle over the cup to cut off the oxygen supply to the fuel
- It is forbidden to modify this fireplace in any way
- Make sure you place the outdoor cover over the fireplace if you will be using it outdoors to ensure that no water or debris get into the burners

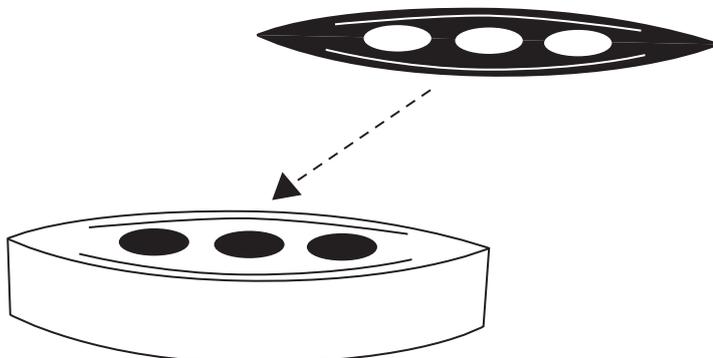

## FUEL INFORMATION

- **USE ONLY APPROVED BIO-ETHANOL LIQUID FUEL FOR FIREPLACES**
- **Bio-Ethanol Liquid Fuel** for fireplaces burns clean without emitting any toxins into the air. Only harmless water vapor and CO<sub>2</sub> are produced as byproducts
- **Bio-Ethanol Liquid Fuel** may be purchased at **[www.anywherefireplace.com](http://www.anywherefireplace.com)**.

## ASSEMBLY INSTRUCTIONS

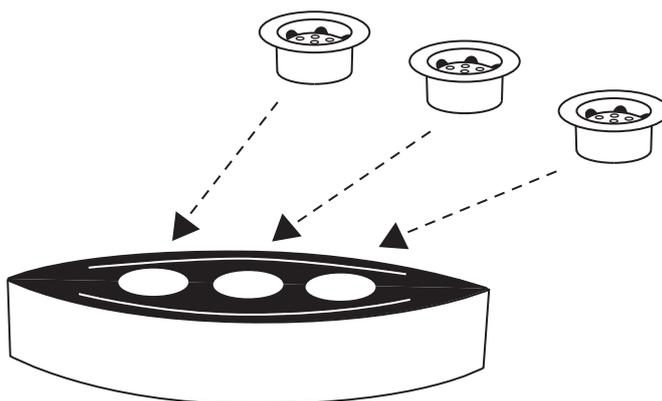

Unpackage all items from the box on a soft surface or towel to avoid scratches to your furniture, floors, or the fireplace.

### Step 1

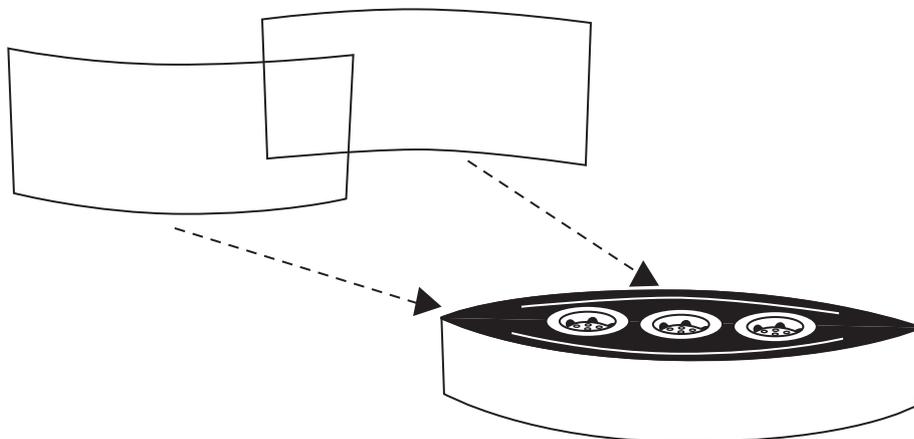

The black top plate (Part F) is provided in order to protect the top of your fireplace from being discolored from the flames.

### Step 2

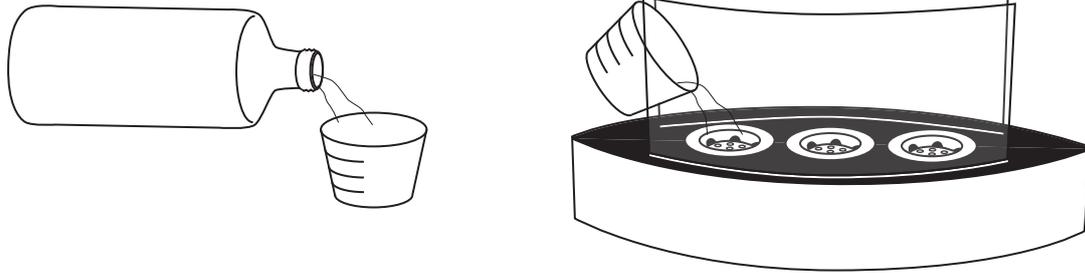

Put fireplace body (Part A) on a steady surface and insert the 3 burner cups (Part C) into the holes on the fireplace body.

### Step 2

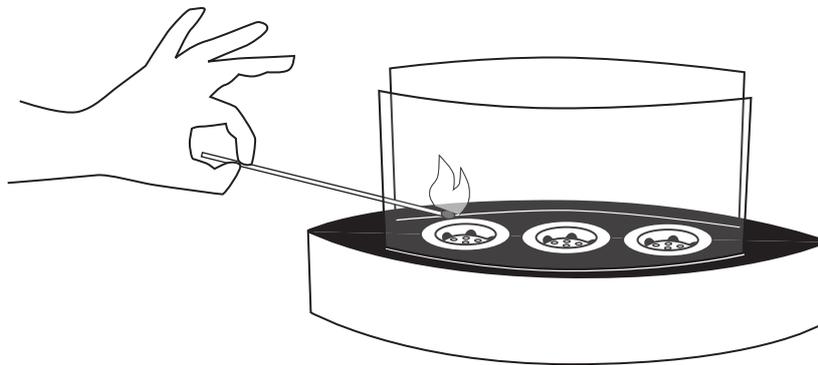

Insert glass pieces (Part B) into slots on the fireplace body.

### Step 3

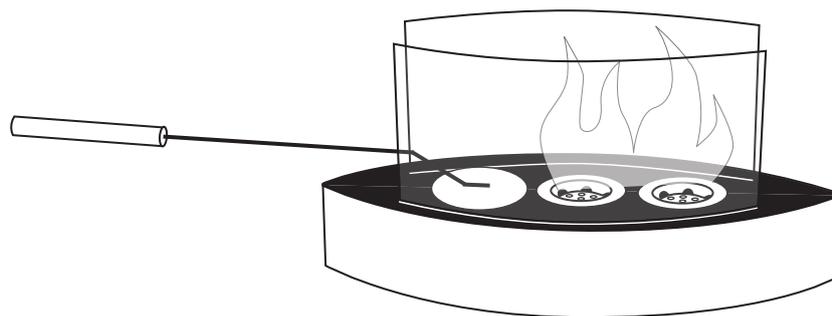

Using the measuring cup provided (Part D), carefully measure 150 ml of **liquid ethanol fuel for fireplaces** and pour it into each burner. **If any fuel does spill, you should always wipe it up prior to lighting your fireplace.**

### Step 4

Be sure to use a long lighter or long match to light the fuel in the burner and ENJOY! Never refill while hot. Wait until it is cool to touch. **ALWAYS USE CAUTION when lighting the fireplace. NEVER fill one burner cup while the others are still lit.**

### Step 5

When finished using the fireplace, the handle provided (Part E) should be placed over each burner cup to cut off the oxygen supply to the fuel. This will snuff out the flame.

**CAUTION: NEVER FILL ONE BURNER CUP WHILE THE OTHERS ARE STILL LIT. Never fill the burner cups with more fuel while the fireplace is still hot or burning. Allow it to cool down before refilling with fuel.**

**CAUTION: Fireplace will be hot while lit and may stay hot for a while after extinguishing the flame.**

Also supplied with your fireplace is a cover that fits over it. If you plan to use your fireplace outside, please keep it covered when not in use to insure that water and debris does not get into the burner and prevent it from functioning properly. **Never put cover on while fireplace is hot.**
